- Submit student academic information
- Generate reports to support FAFSA and state aid application completion

ACCESS MAAPP

To access MAAPP, your public school district or private school must have a valid Participation Agreement on file, and you must have an authorized account.

STEP 1: Complete/Update the Participation Agreement

The Participation Agreement is a data-sharing agreement between the school district/private school and the Mississippi Office of Student Financial Aid. It includes the legalese needed to protect student data. District superintendents/private school headmasters must log in to MAAPP annually to update the agreement.

STEP 2: Request a MAAPP Account

High school counselors, district counselors, school administrators, and teachers may request an account. Each account must be approved by the district superintendent/private school headmaster who signed the Participation Agreement. Visit **MAAPP** to request an account.

SUBMIT STUDENT ACADEMIC INFORMATION

High school counselors are responsible for submitting data (GPA and ACT score) for all graduating high school seniors between January 1 and April 30 each year.

- **Submit Information for Individual Students:** Submit academic information if you only have a few graduating seniors OR if you wish to update information for an individual student. Visit **MAAPP**.
- **Submit a High School Grade File:** Submit academic information for all graduating seniors in a batch file, called the High School Grade File. Follow instructions online to create the High School Grade File. In **MAAPP**, click the blue **Upload Documents** button to upload the file.

GENERATE REPORTS TO SUPPORT FAFSA AND STATE AID APPLICATION COMPLETION

Counselors can generate reports containing state aid application and FAFSA completion data for individual students at their high school. In **MAAPP**, select **Reports**. Click the blue **Export Report** button. Data is reported in an easy-to-use Excel format. Data is also continuously updated, so counselors may generate reports as often as necessary.

- **FAFSA First.** Students who complete a FAFSA are more likely to enroll in college, because the FAFSA provides access to thousands of dollars in federal grants, loans, and even work study. Determine which students have completed the FAFSA and taken a critical step towards college.
- **Free college, anyone?** The Mississippi HELP Grant pays tuition and fees for students who complete the MAAPP and qualify. That's a value of about \$9,500 at a public university or about \$3,500 at a community college. Determine which students have completed the MAAPP, when applications were received, and what supporting documents, if any, are missing.

QUICK HELP *for* COUNSELORS
